## MA 9000 / MD 9000

Ultra high-speed overlock machine

# MA 9000 / MD 9000

## Ultra high-speed overlock machine

### Area of application

- One Overlock range for several applications:
  - General Plain Seaming
  - Blind Hemming
  - Gathering
  - Elastic Tape Attaching
- Suitable for extra-light to heavy materials

### Elastic tape attaching

Auto-Cutting and Re-inserting is possible.

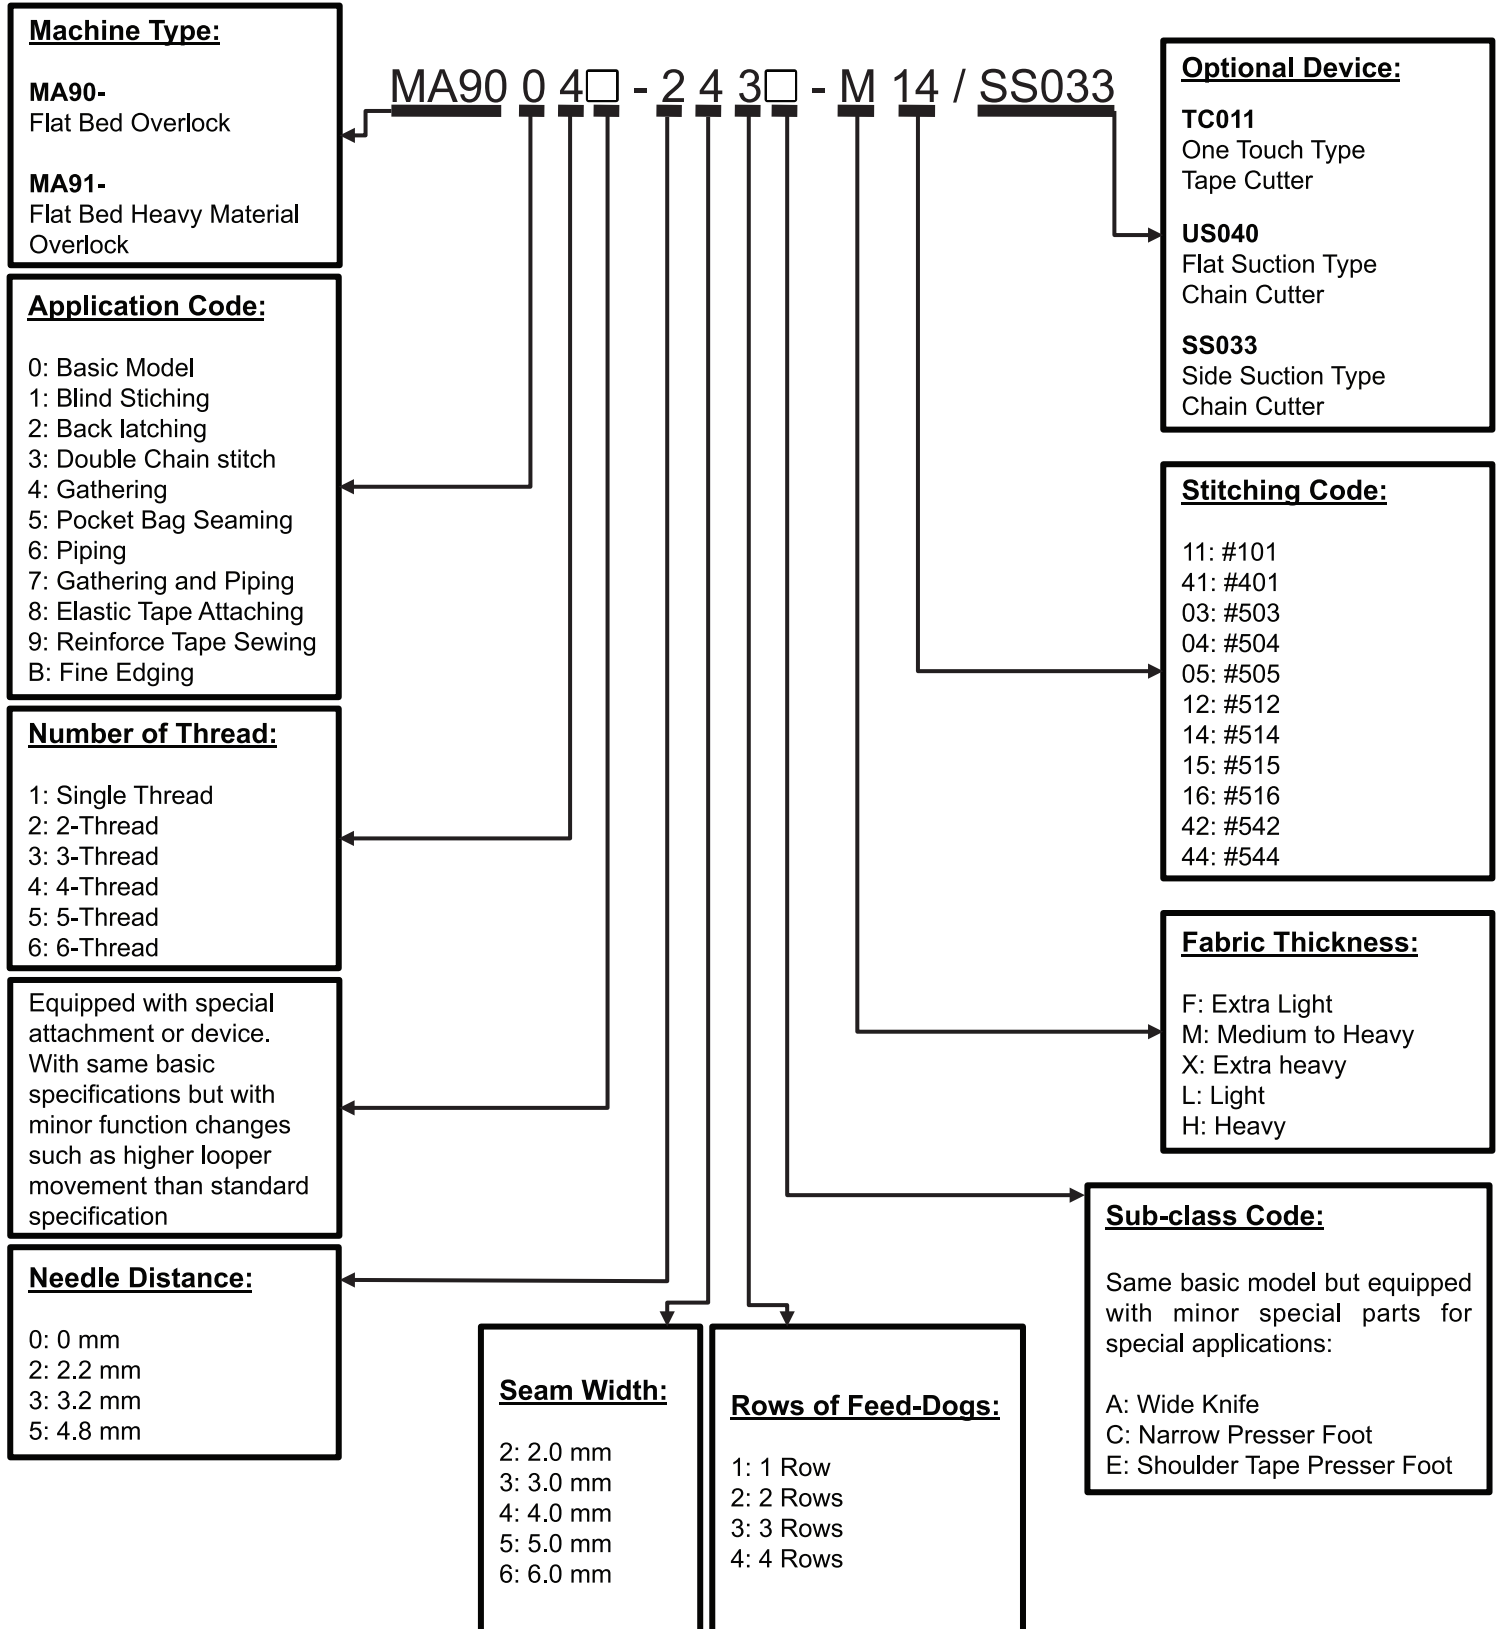

It can meet different sewing requirements by the powerful multi- function operation panel with 27 programs.

- TFU 16-3 / UT-2      Upper Tape Feeder  
(with untangling motor device).  
Feed width 70mm
- TFU 16-8              Upper Tape Feeder  
Feed width 200mm

### Special Features

- Straight needle, super high speed up to 8000 s.p.m.
- Sewing with up to 6 threads possible
- Variuos needle distance from 0 to 4.8 mm
- With auto oiling system ensuring sufficient lubrication; with cartridge oil filter, easy for replacement & cleaning
- Push-button type stitch length regulator, no need for changing the cam
- Micro adjustment of differential feeding ratio
- With thread & needle cooling system, thread & needle can be lubricated and cooled by silicon oil, preventing the thread & needle breakage
- Can be equipped with varied attachment attachments to meet different sewing requirements, which not only greatly reduces the production cost but also achieves Time-saving and Labor-saving
- The Following motor specifications are recommended:
  - Clutch Motor: 400W (1/2 HP)
  - Servo Motor: 550W (3/4 HP)
